

## **VastNet Ltd and B\*Smart Join Forces to announce Analytical Reporting for IFS**

Atlanta, June 16, 2003 – B\*Smart Intelligent Solutions, a business intelligence and analytical reporting provider has joined forces with VastNet Ltd to provide business intelligence and analytical reporting to customers running IFS (Industrial and Financial Systems) Applications. VastNet, a worldwide solutions provider for IFS customers, recognizes the value B\*Smart delivers using pre-packaged Analytical Reporting tools that allow customers to easily leverage the tremendous amount of data in their ERP database.

Rob Hemsley, Director of VastNet Ltd says, “B\*Smart delivers a powerful blend of Business Intelligence and Enterprise Reporting packaged for the IFS Application end-users, built with the power of Business Objects. This blend allows IFS users to perform their own ad-hoc queries/reports and do their own business performance analysis on the data they want. B\*Smart provides a solution that’s unique and I know many more IFS customers will benefit from it.”

“The presence of VastNet in the IFS service space provides B\*Smart with a unique mechanism to inform IFS customers around the world of the immediate availability of this powerful solution. “VastNet impressed us with the same customer focus as that of B\*Smart, so our alliance will be strong and will continue to help cost-sensitive customers leverage their ERP investment”, says Steve Heimburger, B\*Smart VP Sales/Marketing.

**Vastnet, Ltd** is a company dedicated to providing value-added consultancy and solution services for customers running the IFS (Industrial and Financial Systems) ERP solution. Through a vast network of business and IT professional service experts, VastNet has gained a presence matching IFS customer needs with solution experts. More information is available at [www.vastnetltd.com](http://www.vastnetltd.com).

**B\*Smart Intelligent Solutions, Inc** is a Business Intelligence sales, consulting and integration company providing enterprise performance management information to all levels of an organization. B\*Smart was founded to provide Business Intelligence tools with easy Analytical Report creation for the end-user, using powerful and secure capabilities to access and analyze information regardless of the data sources, so managers can fully understand the performance of any cross-section of the enterprise.
